

ROOFERT^(HRF)

Hen Reproductive Formulae

A Poultry Feed Supplement for Enhanced Egg Productivity & Improved Hatchability

Optimal productive performance is the basic fundamental requirement for the profitability of the poultry industry, and for that we must insure maximum productivity and hatchability in every layer / breeder farmer.

Many plant extracts from a wide variety of herbs, spices and derivatives are being used as poultry feed supplements. Many studies have shown their positive effects viz. antimicrobial, antioxidant and regulation of the gut flora, in poultry production. The objective is to increase production – eggs & meat while maintaining the health of the poultry. Herbs and phytochemical compounds have great potential as alternatives to antibiotic growth promoters in monogastric animals.

Roofert^(HRF) is a feed additive containing ovary stimulating herbs, to increase egg production and also increases hatchability in breeders.

Roofert^(HRF) is a natural blend of poly herbs like – Ashwagandha, Shatavari, Latakaranj, Kokilaksha, Kapikachchu, Garger, Gokshur, etc.

Salient Features of Roofert^(HRF)

- A natural blend of proven, poly herbal alkaloids ensures enhanced productivity by stimulating ovarian activity.
- Optimizes the release and action of endocrine hormones like FSH & LH in layers.
- 100% Natural and No side effects, No withdrawal period.
- No risk of residues.

Recommended for:

- Development of reproductive organs and revitalizing the reproductive system.
- Improve the reproduction cycle by stimulating the ovaries and enhancing ovulation.
- Increase and optimize the egg production in layers and breeders.
- Improving the quality and quantity of ovum and semen.
- Improving fertility and hatchability in the breeder flocks.
- Maintains production peaks for a longer period.

Recommended Dosage:

For Breeders : 350 - 450 gm / tonne of feed.
For Commercial Layers : 175 gm / tonne of feed.

Duration:

Recommended from 17th/18th week onward, throughout the reproductive cycle.

Instruction for Mixing:

Roofert^(HRF) should be thoroughly mixed with the protein concentrate or mineral supplement before blending with the remainder of the ingredients to ensure even distribution in the final feed.

Store in a cool dry place. Protect from direct sunlight.
Not for human use. Not for Medicinal use. For Animal use only.
